

Map of areas where flooding is likely to occur if the Arakawa River overflows (duration of flooding)

Name Map of areas where flooding is likely to occur if the Arakawa River overflows (duration of flooding)
Created by Kanto Regional Development Bureau (Ministry of Land, Infrastructure, Transport and Tourism), Arakawa-Joryu River Office, Arakawa-Karyu River Office
Date of designation May 30, 2016
Prerequisite rainfall 632mm of rain in total around Arakawa River in 72 hours (maximum rainfall predicted according to the provisions of the Flood Control Act)

As a general rule, residents should evacuate outside the areas where flooding is likely to occur

How a river flood occurs

A river flood occurs when heavy rainfall raises the level of the river to a height where it crosses or breaks an embankment. This kind of flooding is also called “inundation”. As Sumida City is located by the lower reaches of the Arakawa river, flooding also occurs due to rising water levels after typhoons.

Water level rises past the top of the embankment Embankment is broken by excess water, etc.

As a general rule, residents should evacuate outside the areas where flooding is likely to occur

Duration of flooding

Flood evacuation sites (river flood) *Flood evacuation sites are available for those who are unable to leave the area in time.

No.	Facility	No.	Facility
①	Ryogoku Elem. Sch.	12	Yokokawa Elem. Sch.
②	Midori Elem. Sch.	13	Sotode Elem. Sch.
③	Chuwa Elem. Sch.	14	Ryogoku J. H. Sch.
④	Kikukawa Elem. Sch.	15	Futaba Elem. Sch.
⑤	Kinshi Elem. Sch.	16	Kinshi J. H. Sch.
⑥	Yanagishima Elem. Sch.	17	Tatekawa J. H. Sch.
⑦	Narihira Elem. Sch.	38	Sakuratsutsumi J. H. Sch.
⑨	Sumida J. H. Sch.	39	Sumida City Athletics Ground
10	Koume Elem. Sch.		
11	Honjo J. H. Sch.		

Elementary and junior high schools that are not designated as flood evacuation sites

No.	Facility	No.	Facility
8	Kototoi Elem. Sch.	29	Daiyon-azuma Elem. Sch.
18	Tachibana Azumanomori Elem. Sch.	30	Hikifune Elem. Sch.
20	Higashiazuma Elem. Sch.	31	Bunka J. H. Sch.

28	Daisan-azuma Elem. Sch.		

Map legend

- Sumida City Office *Not an evacuation site
- Dangerous area during flood (underpass (area where road, etc. is low due to grade separation))
- Area of river, etc.
- Evacuation direction

Legend for flood evacuation sites

- ALL All floors can be used to shelter
- 2 2nd floor and above can be used to shelter
- 3 3rd floor and above can be used to shelter
- ①, ②, ③: Flood evacuation sites (river flood)
- 8, 18, 20: Elementary and junior high schools that are not designated as flood evacuation sites

Predicted duration of flooding (river flood)

Duration of flooding of Arakawa River (0.5m+)

- 2 weeks +
- 1 week +, less than 2 weeks
- 3 days +, less than 1 week
- 1 day +, less than 3 days
- 12 hours +, less than 1 day
- Less than 12 hours

*Tachibana Kindergarten⑨, etc. and Yahiro Area Plaza② are not included in this map and list as all floors will be flooded. *If you cannot evacuate to an evacuation site, etc. in time, you can shelter in a space such as metropolitan housing or city-operated housing (shared spaces). Please be aware that you will not have access to food or lifelines, and may be stranded there for 2 weeks or more.
