

## Calculation Method of the Fiscal Year 2025 National Health Insurance (NHI) Premiums

NHI premiums are the total of medical treatment charges, medical care support funds for the elderly, and the Grant for Long-Term Care Benefit Expenses.

The total amount of each equal rate and income-based rate of members become the annual premiums of the household.

The calculated Basic Amount refers to the amount of total net income from the preceding fiscal year (from January 1<sup>st</sup> to December 31<sup>st</sup>) minus the 430,000 yen basic exemption. However, there are cases where Calculated Basic Amount may be calculated with reduction measures of the premiums applied.
